

INFLUENCE OF PSYCHOPATHOLOGICAL DISORDERS OF CHILDREN IN FAMILY STRUCTURE AND FUNCTIONING

MARITAL AND FAMILY THERAPY FRAME

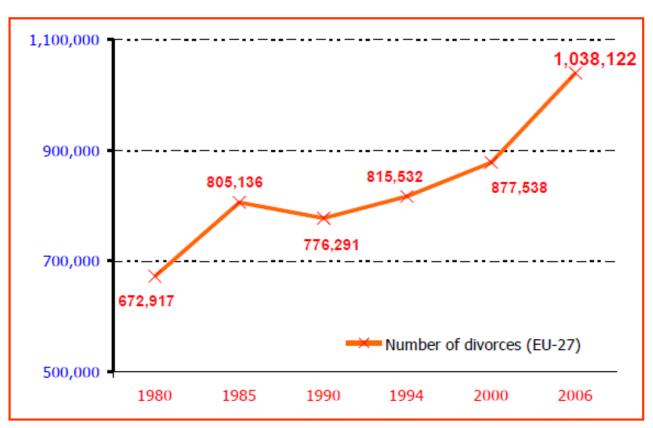

CURRENT SITUATION

1. MARITAL FUNCTIONING

Marital breakdown I

More than 1 million annual divorces

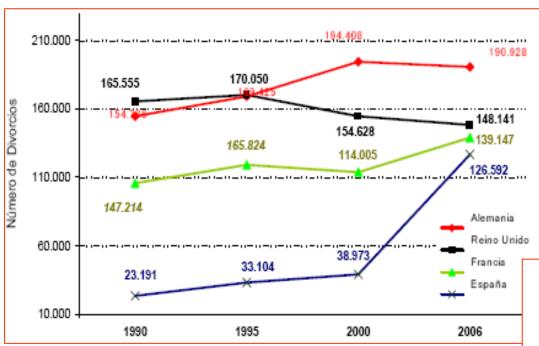

One marital breakdown every 30 seconds

Over 10 million marital breakdowns in 10 years, that have affected over 15 million children

Marital break-down II

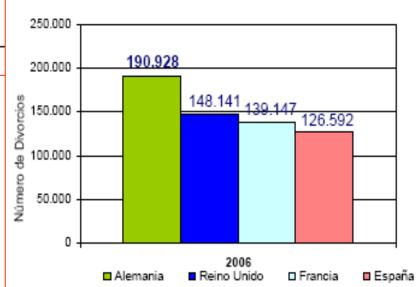

Germany, UK, France and Spain are the UE27 countries with the highest number of divorces.

Source: Institute for Family Policies

Family breakdown has increased by far the most in Spain in the last 10 years.

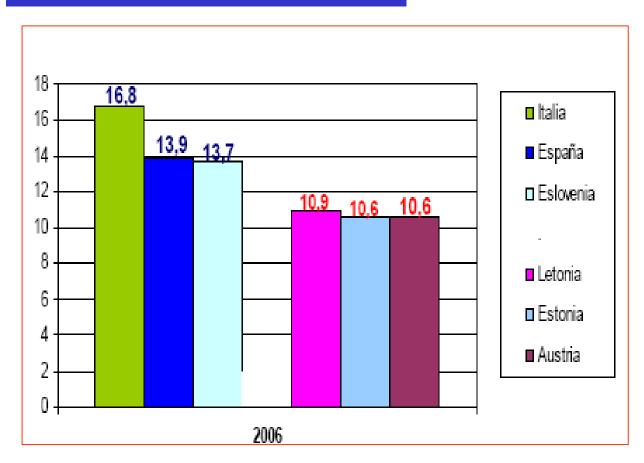

In Spain, family breakdown has increased by 268% in 10 years...

Marital break-down III

In europe, marriages that fail last a mean of 13 years.

Italy is the country where marriage lasts longest (16.8), and Austria the one where it lasts least (10.6).

In Spain, marriage lasts a mean of 14 years

Source: Institute for Family Policies

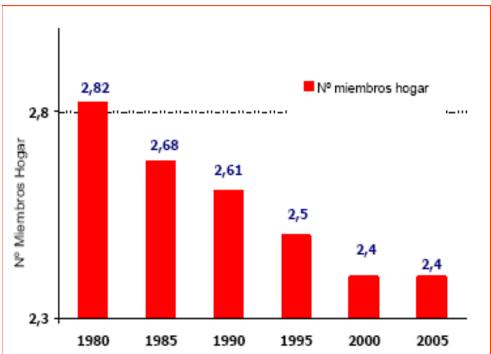

CURRENT SITUATION

2. FAMILY FUNCTIONING

European households I

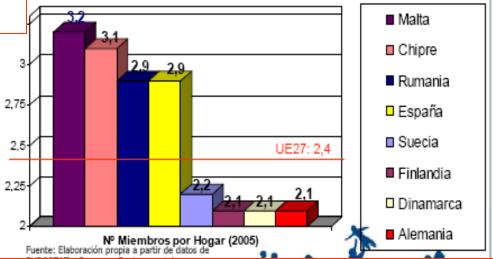

Only 2.4 members per household

1.5 persons per household have been 'lost' since 1980

Malta, Cyprus, Romania and Spain are the countries with the highest number of members per household

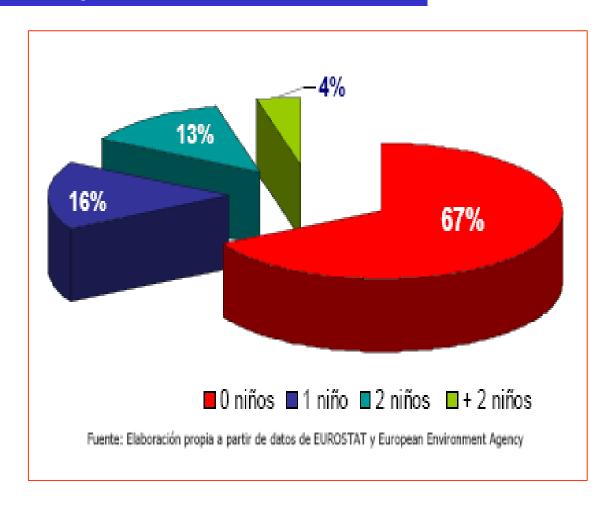

Source: Institute for Family Policies

European households II

Households have fewer children.

2 out of 3 households have no children

Only 17% of households have 2 or more children

CURRENT SITUATION

3. ADULT PSYCHOPATHOLOGY

HOSPITAL ADMISSIONS IN 2007

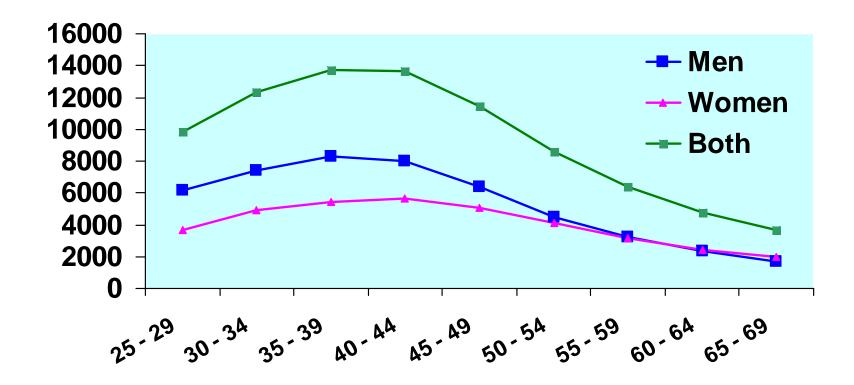

35 – 44 years old: 1.037.803 days admitted to hospital

HOSPITAL DISCHARGES IN 2007

35 – 44 years old: 27.376 mental illness discharges

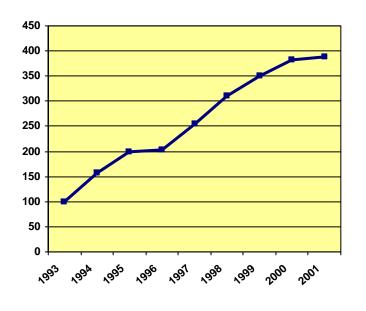

CURRENT SITUATION

4. CHILDREN PSYCHOPATHOLOGY

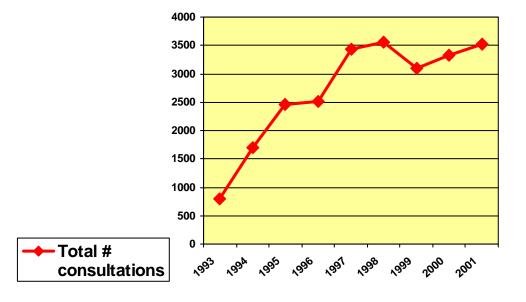

EVOLUTION OF CHILDREN AND ADOLESCENT PSYCHIATRY CONSULTATIONS

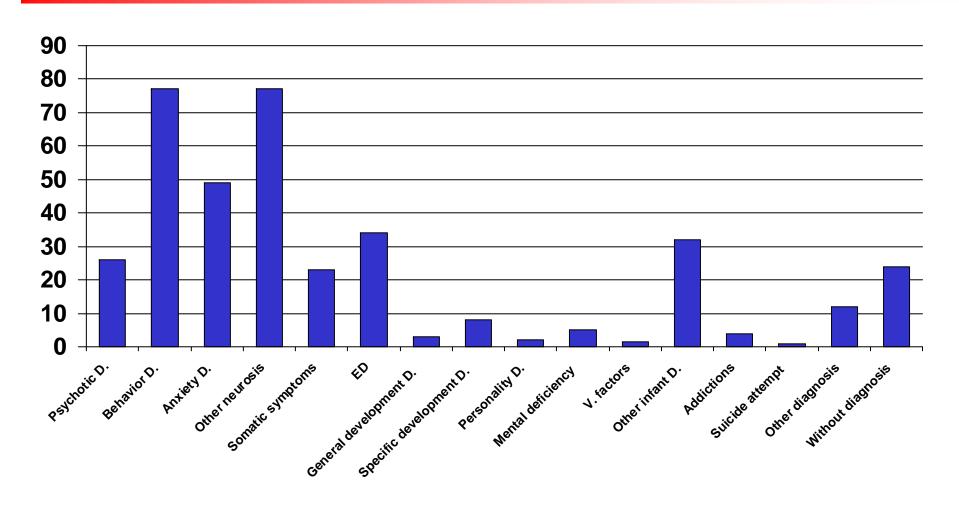

--- Patients

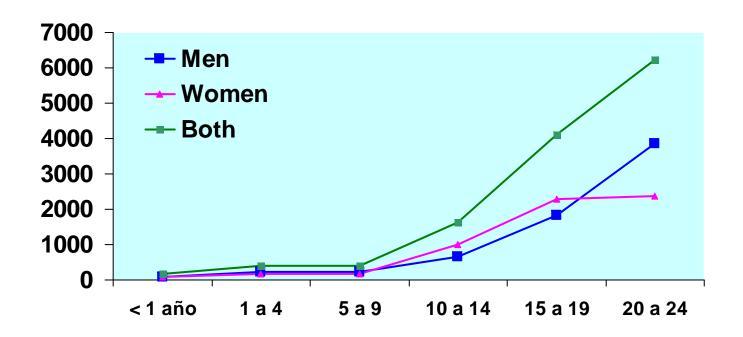

CHILDREN AND ADOLESCENT PROGRAM

HOSPITAL ADMISSIONS

15 - 24 years old: 10.329 mental illness discharges

ADHD

CONSEQUENCES OF UNTREATED ADHD

HEALTH

50% ↑ bike accidents 1
33% ↑ emergency room visits2
2–4 x other vehicle accidents 3-5

PATIENT

FAMILY

3-5 x ↑ divorce or separation^{11,12} 2-4 x ↑ fights among siblings ¹³ depression in parents

SCHOOL/WORK

46% expelled 35% leaving ⁶ Lower occupational level⁷

SOCIETY

2x risk of
Substance abuse 8
Early onset 9
More likelihood of
consumption
in adulthood 10

WORK (PARENTS)

↑ Work absence Lower productivity¹⁴

SOCIOECONOMIC STATUS

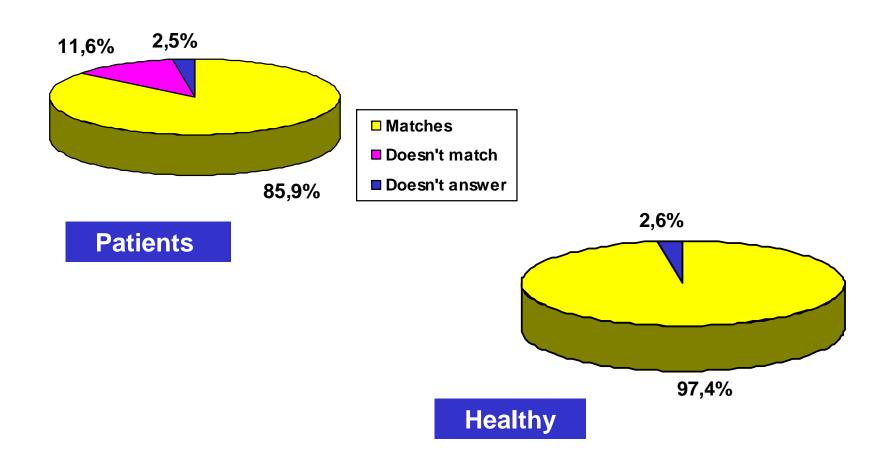

PSYCHIATRIC DIAGNOSIS OF CHILDREN

AGE – ACADEMIC YEAR

DAS: Dyadic Adjustment Scale: measures the quality of dyadic relationships

• FORMAT:

- 32 items.
- Different response formats (Likert scales from 2 to 7 points)

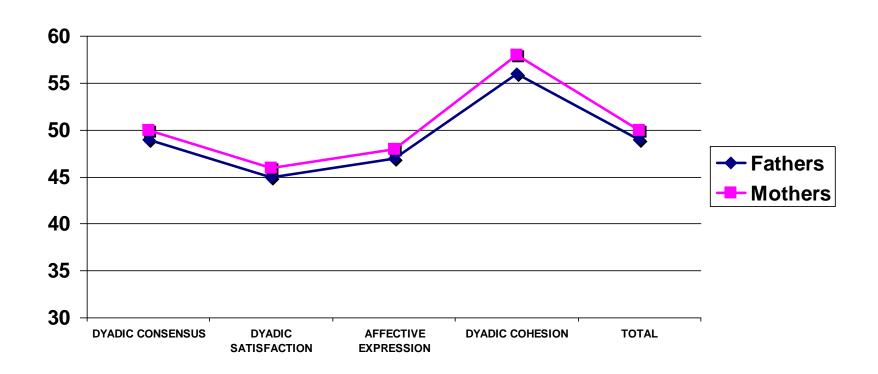

• SCALES:

- Dyadic Consensus
- Dyadic Satisfaction
- Affectional Expression
- Dyadic Cohesion
- Dyadic Adjustment (global scale)

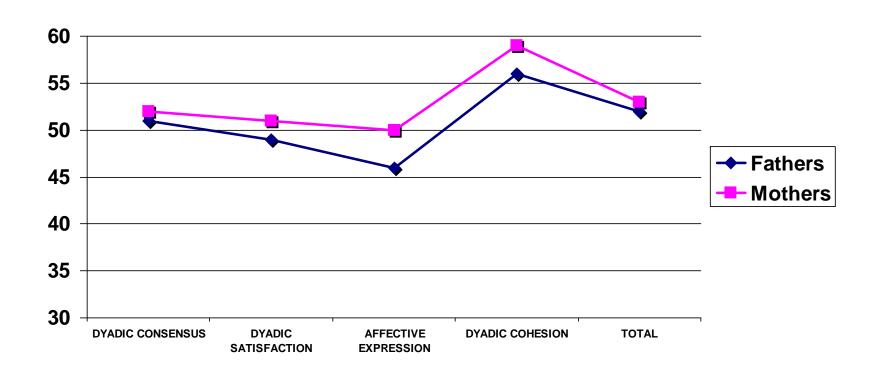

DAS - PARENTS OF ILL CHILDREN

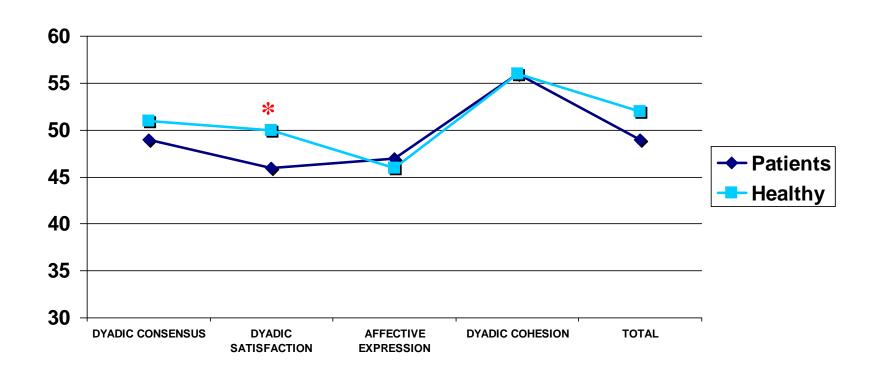

DAS - PARENTS OF HEALTHY CHILDREN

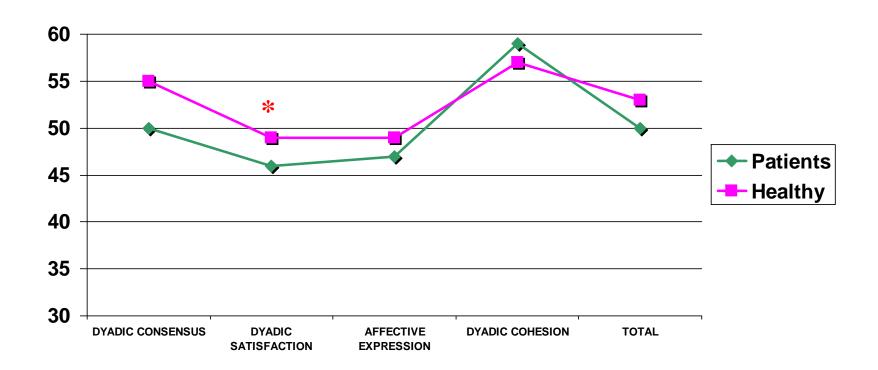

DAS - FATHERS OF BOTH SAMPLES

DAS - MOTHERS OF BOTH SAMPLES

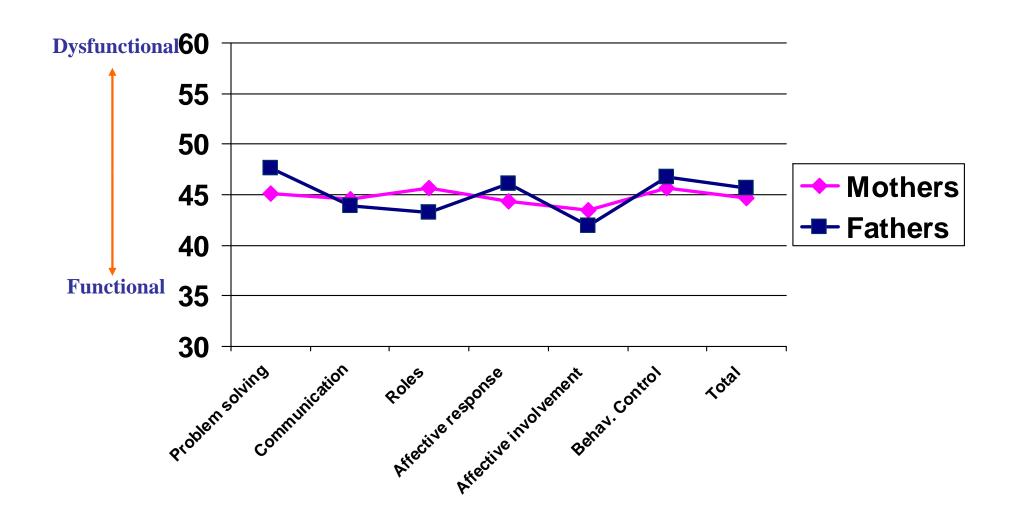

FAD: McMaster Family Assessment Device: measures family functioning

- FORMAT: 60 items.
- SCALES:
 - Problem solving
 - Communication
 - Roles
 - Affective responsiveness
 - Affective involvement
 - Behaviour control

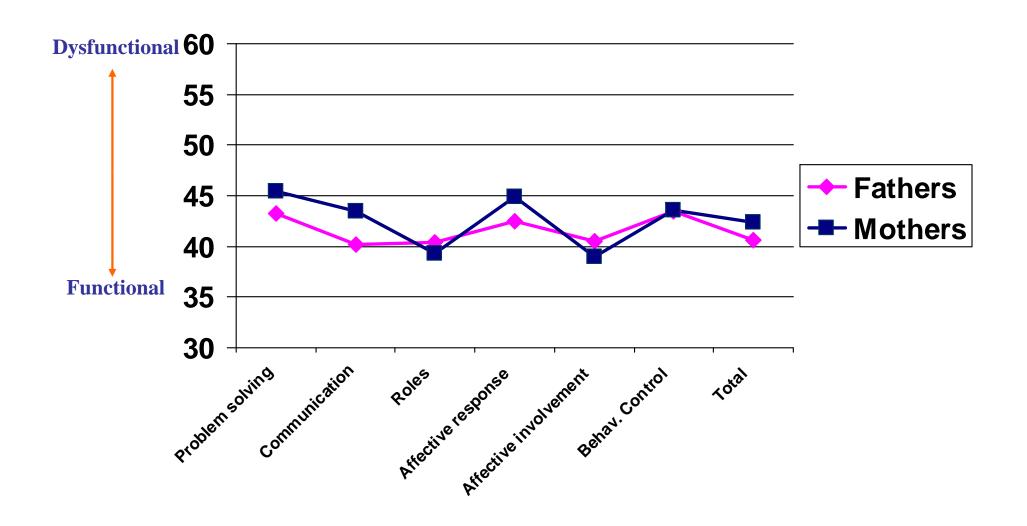

FAD - PARENTS OF PATIENTS

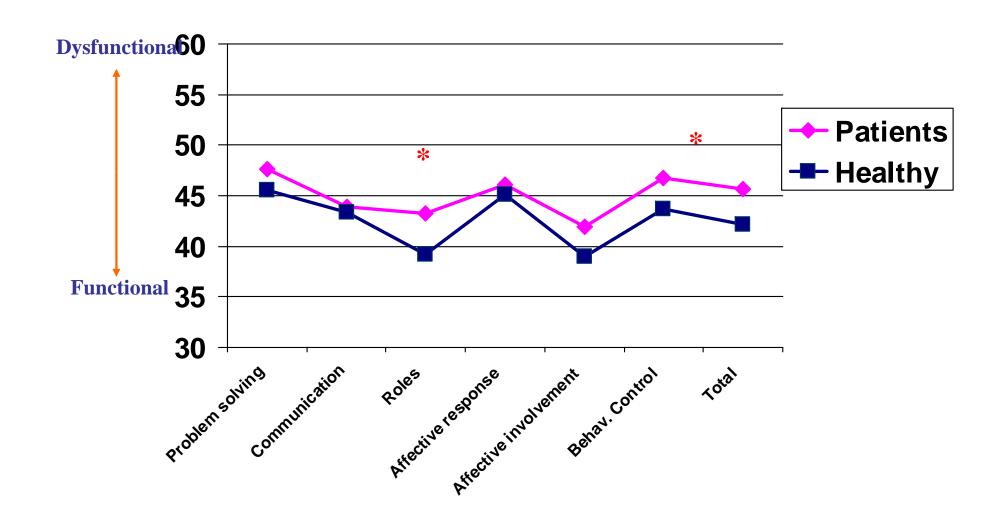

FAD - PARENTS OF HEALTHY CHILDREN

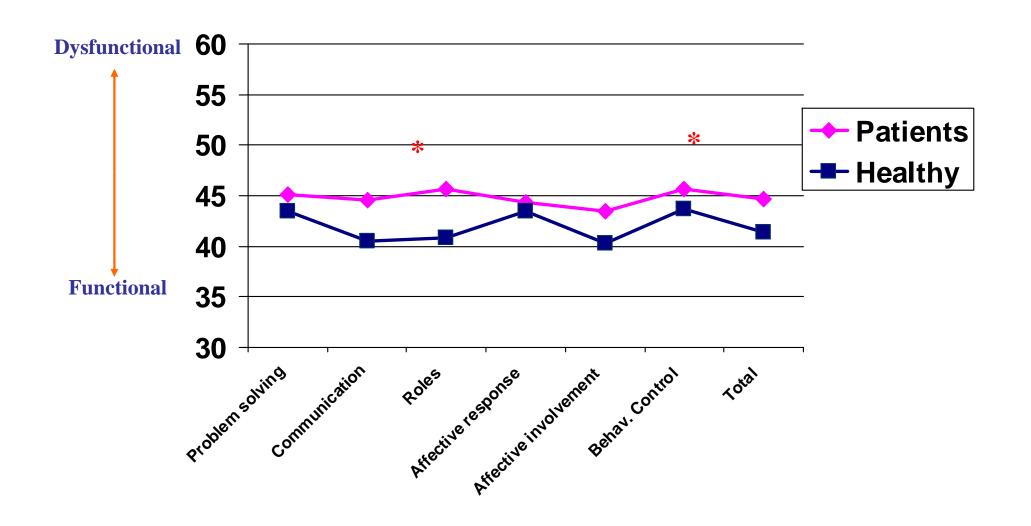

FAD - FATHERS OF BOTH SAMPLES

FAD - MOTHERS OF BOTH SAMPLES

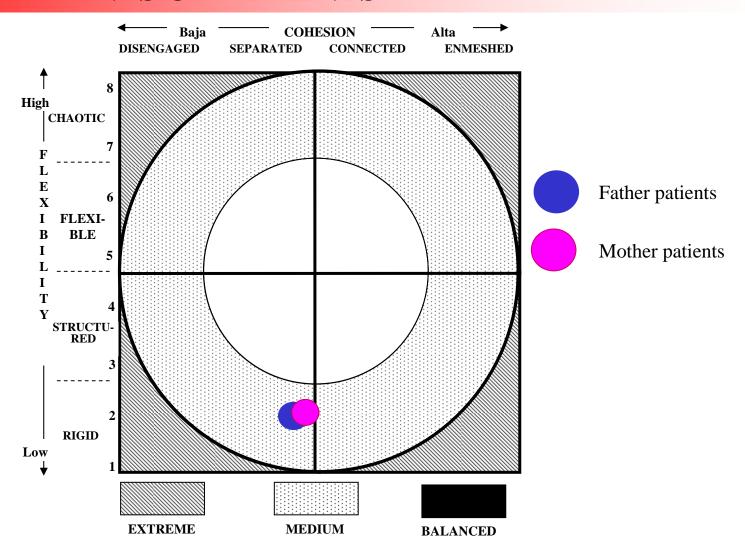

FACES III: Family Adaptability and Cohesion Evaluation Scale: measures adaptability and family cohesion

- FORMAT: 20 items.
- SCALES:
 - Cohesion: assesses emotional bonds betwen family members
 - Adaptability: assesses family ability to vary its structure when needed
 - Both scales are represented with the Olson Circumplex
 Model

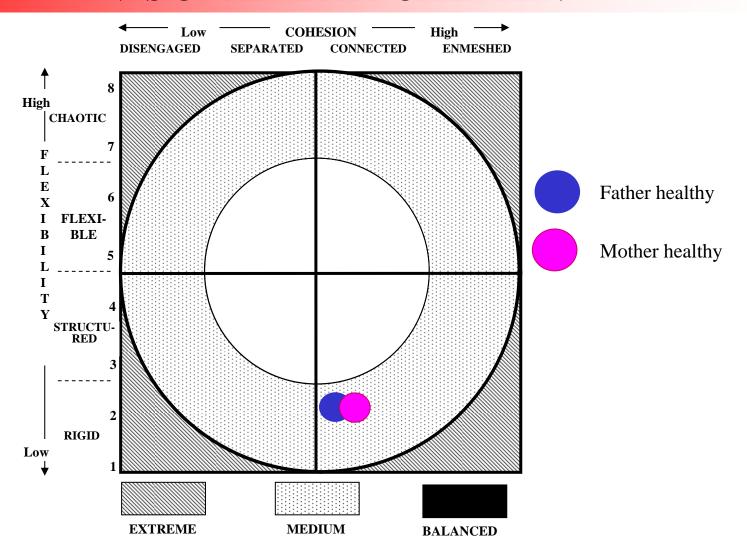

FACES - PARENTS OF PATIENTS

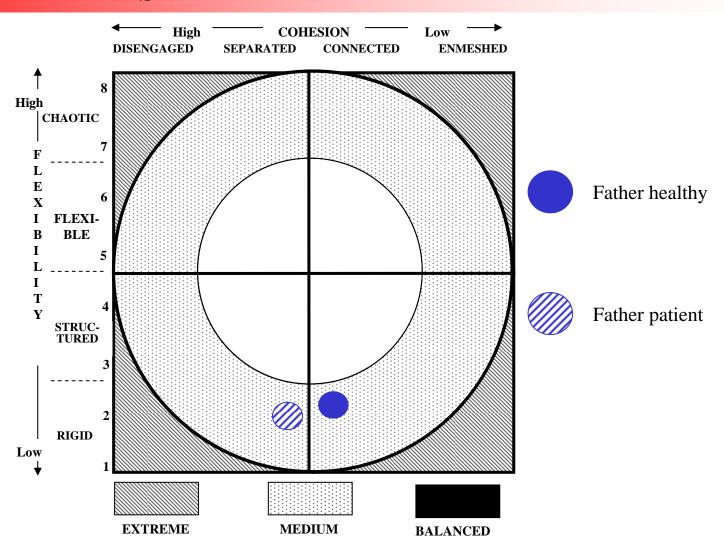

FACES – PARENTS OF HEALTHY CHILDREN
